Re: WYGG (FM), Asbury Park, New Jersey
Facility Identification Number: 19867
Minority Business & Housing Development, Inc.
Special Temporary Authorization

Dear Counsel:

This is in reference to the request filed April 1, 2009, on behalf of Minority Business & Housing Development, Inc. ("MBHD"). MBHD requests further extension of the special temporary authority ("STA") granted on January 4, 2007, to operate Station WYGG from a site other than the licensed site.¹ In support of the request, MBHD states that implementation of its Construction Permit BPED-20070403ABV for new, permanent facilities has been delayed by zoning issues.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Our review indicates that, subsequent to the filing of its request for extension of STA, MBHD filed Application BMPED-20090424ABH, for modification of its permit, and that the application was granted on April 30, 2009. Thus, extension of STA is warranted in order to allow time for construction of the newly authorized, modified facilities.

¹ WYGG is licensed for operation on Channel 201A (88.1 MHz) with effective radiated power ("ERP") of 0.1 kW (H&V) and antenna height above average terrain ("HAAT") of 10 meters. Construction Permit BMPED-20090424ABH authorizes relocation of the transmitter and operation with ERP of 0.001 kW (H), 0.92 kW (V), (Max-DA), and HAAT of 34 meters. The permit expires on July 23, 2010.

Accordingly, the request for extension of STA IS HEREBY GRANTED. Station WYGG may continue to operate with the following facilities:

Geographic coordinates:	40° 13' 09" N, 74° 00' 27" W (NAD 1927)
Channel	201 (88.1 MHz)
Effective radiated power:	Not to exceed 0.08 kilowatt (H&V)
Antenna height:	
above ground:	14 meters
above mean sea level:	16 meters
above average terrain:	6 meters

MBHD must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR § 1.1310.

This authority expires on **January 30, 2010**.

Sincerely,

A handwritten signature in blue ink, appearing to read "Charles N. Miller", with a long horizontal flourish extending to the right.
