

## STATEMENT RE MULTIPLE APPLICATIONS

Applicant has filed applications for permits to construct new noncommercial FM stations to serve the communities of Gunnison and Almont, Colorado. The applications are not mutually exclusive, but there is overlap between the principal community contours of the proposed stations. Applicant's governing documents require that applicant maintain diversity of ownership as provided in Section 73.7003(b) (2) of the Rules. Consistent with that commitment, in the event that either application is mutually exclusive with another application, Applicant will dismiss one of the applications or take other steps necessary to assure that it will not concurrently hold an attributable interest in two authorized construction permits with overlapping principal community contours.
