

Exhibit 12 – Interference to Translator or Booster Input Signals

The proposed WVQC-LP modification will remain in compliance with §73.827(a). There are eleven (11) existing or proposed FM Translator or FM Booster facilities located within the worst case 10 km radius of the WVQC-LP site. However, there will be no co- or adjacent channel relationship between the WVQC-LP transmit frequency (CH239L1) and the input signal of any of the Translator or Booster facilities. Therefore full compliance will be maintained with §73.827(a). A listing of the affected concerns and Primary Broadcast Stations is as follows:

FCC FM database file, File Date: 01-10-18 Key Word Search:
