

**ENGINEERING STATEMENT OF JAMES D. SADLER  
IN SUPPORT OF A REQUEST FOR  
SPECIAL TEMPORARY AUTHORITY  
STATION WHUN – HUNTINGDON, PENNSYLVANIA  
1150 kHz – 5 kW-D, 0.036 kW-N, U, ND  
Facility ID: 28131**

**Licensee: Southern Belle, LLC**

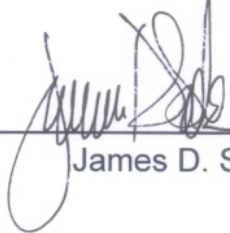

I am a Technical Consultant, an employee in the firm of Carl T. Jones Corporation, with offices located in Springfield, Virginia. My education and experience are a matter of record with the Federal Communications Commission.

This office has been authorized by Southern Belle, LLC, licensee of AM Broadcast Station WHUN, Huntingdon, Pennsylvania, to prepare this engineering statement in support of a request for Special Temporary Authority (STA). Station WHUN is licensed for operation on 1150 kilohertz with power of 5 kilowatts during daytime hours and 0.036 kilowatt during nighttime hours employing a non-directional antenna during both daytime and nighttime hours.

The station has suffered a failure of its main transmitter. It appears that the parts to repair the transmitter are no longer available and it is anticipated that the transmitter will have to be replaced. The station is currently operating during daytime hours at a reduced power of 100 Watts. Nighttime operation remains as authorized with 36 Watts. Therefore, Special Temporary Authority (STA) is requested to operate WHUN with reduced power during daytime hours until the transmitter parts can be located or the transmitter can be replaced and the operating power is restored to the authorized value.

This statement was prepared by the undersigned and the information contained herein is believed to be true and correct.

DATED: January 11, 2018
