

ENGINEER'S DECLARATION

I, Jarrod Franklin, do hereby declare the following:

1. That I have been employed as a consulting engineer with the firm of

Franklin Communications, Inc.
Birmingham, AL;
4. That du Treil, Lundin & Rackley was retained by Williams Communications, Inc. for the purpose of preparing its application for the construction permit of WHMA-FM Hobson City, Alabama, from which the underlying Construction Permit (FCC File Number BPH-20040521AEP) was granted by the commission;
5. That I am familiar with the terms and conditions of the WHMA-FM Construction Permit;
6. I hereby certify that I have overseen the installation of the WHMA-FM directional antenna and that the installation was complete to the manufacturer's instructions;
7. That the relative field strength of neither the measured horizontally nor vertically polarized radiation component shall exceed at any azimuth the value indicated on the composite radiation pattern authorized by the Construction Permit;

A relative field strength of 1.0 on the composite radiation pattern authorized by the Construction Permit corresponds to the following effective radiated power:

0.530 kilowatt

Principal minima and their associated field strength limits:

250 degrees True: 0.045 kilowatt

8. That, the licensee shall, upon completion of construction and during the equipment test period, make proper RF field strength measurements throughout the transmitter site area to determine if there are any areas that exceed the FCC guidelines for human exposure to RF fields. If necessary, a fence will be erected at such distances and in such a manner as to prevent the exposure of humans to RF fields in excess of the FCC Guidelines (OET Bulletin No. 65, Edition 97-01, August 1997). If a fence is necessary, it will be a type which will preclude casual or inadvertent access, and will include warning signs at appropriate intervals which describe the nature of the hazard. Any areas within the fence found to exceed the recommended guidelines will be clearly marked with appropriate visual warning signs.

9. That, the licensee shall, in coordination with other users of the site reduce power or cease operation as necessary to protect persons having access to the site, tower or antenna from radiofrequency electromagnetic fields in excess of FCC guidelines;

10. That, program tests for WHMA (Facility ID# 52320) will not commence on channel 238A with the facilities specified in the Construction Permit until program tests for WFMH-FM (Facility ID# 24578) commence on channel 238A with the facilities authorized in BPH-20040623ABT and it understood that a license will not be granted for WHMA-FM on Channel 238A with the facilities specified in the Construction Permit until a license is granted for WFMH-FM on channel 238A with the facilities authorized in BPH-20040623ABT; and

11. That, program tests may be conducted in accordance with Section 73.1620 of the Commission's rules provided that Station WTRB-FM (Facility ID# 704) has commenced operation at Ashland, Alabama.

Dated: Janet Finkler

Signed: 11/11/05
