

RADIO MULTIPLE OWNERSHIP ANALYSIS -12/22/2003

This statement and the attached figures were prepared on behalf of Clear Channel Broadcasting Licenses, Inc. ("Clear Channel"), a licensee subsidiary of Clear Channel Communications, Inc. Clear Channel proposes to acquire the facilities of KSSS(FM), KQDY(FM), and KBMR(AM). A multiple ownership analysis was prepared considering the following radio stations under present or proposed common ownership or time brokerage:

Table 1: Proposed Commonly Owned or Controlled Stations Studied

Call Sign	Facility_id	City	State
KBMR	2207	BISMARCK	ND
KXMR	2211	BISMARCK	ND
KFYR	41426	BISMARCK	ND
KCJB	55681	MINOT	ND
KYYY	41424	BISMARCK	ND
KQDY	2204	BISMARCK	ND
KSSS	2210	BISMARCK	ND

Since certain of these stations have overlapping principal community contours (5 mV/m for AM stations, 3.16 mV/m for FM stations), an ownership study has been prepared in accordance with the Federal Communications Commission's multiple ownership rules¹.

Clear Channel does not have an attributable interest in any other station with a principal community contour that overlaps or intersects the proposed stations.

Radio Markets

The "radio market" applicable to common ownership of the subject stations is defined as the area encompassed by the mutually overlapping principal community contours of the proposed commonly owned stations. These mutually overlapping contours form two (2) "radio markets", as shown in *Figure 1*, for analysis under the Commission's rules.

¹ See 47 C.F.R. § 73.3555.

Listing of "Markets"

Market 1	Market 2
4-AM 2-FM	3-AM 3-FM
KBMR(AM)	KBMR(AM)
KCJB(AM)	KFYR(AM)
KFYR(AM)	KXMR(AM)
KXMR(AM)	KQDY(FM)
KQDY(FM)	KSSS(FM)
KSSS(FM)	KYYY(FM)

Count of Stations in Defined Markets

The number of radio stations in a "radio market" is determined by counting the operating, commercial stations having principal community contours that overlap or intersect the principal community contours that define the radio market, plus the subject commonly owned or controlled stations.

For simplicity of analysis only the contours of stations overlapping or intersecting the contour of KXMR(AM) has been tabulated. KXMR(AM) is a station of interest and is part of each of the "radio markets" defined in the listing of "markets" above.

There are at least 20 stations that are not attributable to Clear Channel Communications, Inc. or its licensee subsidiaries that are counted as being "in" each of the two markets identified, by virtue of having principal community contours that overlap or intersect the contour(s) that define in whole or in part the individual market(s). See Figure 2. Only known licensed, operating commercial stations were included in this tabulation. Distances to contours for AM stations were predicted using the antenna patterns as identified in the Commission's AM database and the appropriate Ground Wave Field Strength versus Distance Graph of 47 C.F.R. § 73.184. Ground conductivities were obtained from FCC Figure M3. Distances to the FM contours were determined based on the method of 47 C.F.R. § 73.313. Terrain data was derived from the N.G.D.C. 30 second computer database for each of the FM stations using radials spaced every 10 degrees of azimuth.

Based on the above, it is concluded that the proposed modifications comply with § 73.3555(a) of the FCC Rules.

Sincerely,

Troy G. Langham
FCC Specialist
Clear Channel Broadcasting Licenses, Inc.
