Re: Capstar TX LLC, (Capstar)
WAEB(AM), Allentown, PA
Facility Identification Number: 14371
Special Temporary Authority (STA)
BESTA-20190909AAK

Dear Mr. Davis:

This is in reference to the request filed on September 9, 2019. Capstar requests a further extension of the STA granted on May 16, 2008, to operate with parameters at variance pending the filing of the required FCC Form 302 application for a new license.¹ In support of the request, we note that Capstar will require additional time to file the application to update all operating parameters.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

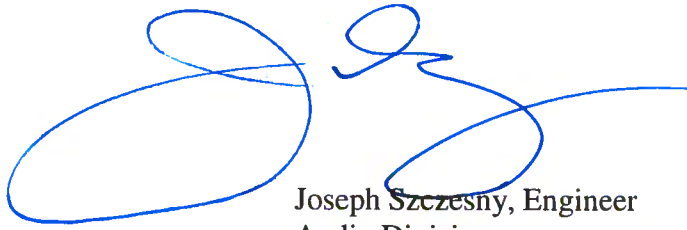

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Accordingly, the request for extension of the STA IS HEREBY GRANTED, and Capstar may continue to operate with DA parameters at variance and/or reduced power while maintaining monitor points within licensed limits, or using a nighttime ND antenna using a maximum of 0.375 kW, or with Moment Method derived DA parameters (kept within 5% current ratio and 3° phase of those parameters). Capstar must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. See 47 CFR § 1.1310. Capstar must submit to my attention an e-mail to note the date the application was filed.

¹ WAEB is licensed for DA operation on 790 kHz with 3.6 kW day and 1.5 kW night.

This authority expires on **March 26, 2020.**

Sincerely,

A handwritten signature in blue ink, consisting of a large, stylized 'J' followed by a smaller 'S' and a long horizontal flourish.
