EXHIBIT A

This modification of construction permit for WQZY, Channel 240C0, Dublin, Georgia, is being filed concurrently and contingently with an application to upgrade station WWBD to Channel 239C3 at Bamberg, South Carolina. The Bamberg application is seeking a one-step upgrade. The allocation reference site at Dublin (for allocation reference purposes only) is fully spaced to the allocation reference site for Channel 239C3 at Bamberg. No other Class C0 channels are available for use at the WQZY allocation site.

The proposed application site at Bamberg seeks §73.215 processing with respect to the WQZY construction permit site, as specified in this application, protecting WQZY as a maximum Class C0 facility. As such, WQZY is considered a fully spaced Class C0 facility with respect to the proposed WWBD, Channel 239C3, Bamberg, application, as well as all other licensed, applied for or proposed facilities. State Broadcasting Corporation specifically **does not** request processing pursuant to §73.215 for WQZY, Channel 240C0, Dublin, Georgia.
