RE: Broadcast Station/KFOI

To Whom It May Concern:

Sharrah Dunlap Sawyer Inc, on November 7, 2017, established a Geodetic Azimuth baseline at the Communication Site on In-Skip Hill, California, using two Trimble R8 GPS units. From this baseline a true bearing was established to determine the azimuth of 2 Shively 6025 panel antenna to be 288 degrees from true north (+/- 30 minutes).

Regards,

Josh Martin, P.L.S.
