

WJCD STA Request

WJCD seeks Special Temporary Authority (“STA”) to temporarily relocate its main antenna to a lower height upon the existing tower, with an increase in effective radiate power, maintaining the resulting 60 dBu contour to within that of the licensed location. Below is a map demonstrating no extension of 60 dBu contour.

This relocation is necessary to facilitate tower modifications in close proximity to the present antenna location. It is in the public interest that WJCD be allowed to continue at near full area coverage during this antenna work.
