

## EXHIBIT 11

This narrative exhibit is submitted to demonstrate that this proposal fully complies with the interference criteria set forth in Section 74.1204 of the Commission's rules. Attached at exhibit 12 are a spacing study, an additional narrative exhibit, and maps demonstrating clearly that there is no prohibited overlap between this proposal and any other FM services. The attached FM spacing study demonstrates that this proposal would be fully spaced even as a full power Class A FM station to all but five other FM facilities. The attached maps demonstrate that there is no prohibited contour overlap between these five facilities and the instant proposed FM translator facilities. Two new unbuilt FM translators, one currently operating FM translator; and one operating full power FM station have also been included on the maps because of their proximity to the proposed facilities. As demonstrated in these maps no prohibited overlap with these stations is predicted.

The nine facilities that have been included on the attached maps are: WDAS-FM, 105.3, Philadelphia, PA (54 dBu contour to proposed 34 dBu interference contour); WMGH-FM, 105.5, Tamaqua, PA (60 dBu contour to prop. 54 dBu int. contour); WILQ, 105.1, Williamsport, PA (54 dBu contour to prop. 48 dBu int. contour); WIOV-FM, 105.1, Ephrata, PA (54 dBu contour to prop. 48 dBu int. contour); WYCY, 105.3, Hawley, PA (60 dBu contour to prop. 40 dBu int. contour); WPZX, 105.9, Pocono Pines, PA (60 dBu contour to prop. 100 dBu int. contour); W288BE, 105.5, Wilkes-Barre, PA (60 dBu contour to prop. 54 dBu int. contour); W287AY, 105.3, Mount Pocono, PA (60 dBu contour to prop. 40 dBu int. contour); and W287BB, 105.3, Tunkhannock, PA (60 dBu contour to prop. 40 dBu int. contour).

WKAB 105.3 West Hazleton, PA Interference Analysis, Blown Up Scale is a map included to more clearly demonstrate that no proposed overlap exists between this proposal's 54 dBu interference contour and the 60 dBu coverage contour of WMGH-FM, Tamaqua, PA. The final three attachments to this exhibit are a 74.1204(d) study with regard to overlap between this proposal and the coverage contour of WPZX, Pocono Pines, PA. A scale of kilometers has been included on the maps. These maps were drawn to scale using the rfSoftware series of computer programs.
