April 8, 2009

In evaluating the proposed conversion to digital for W31BA, FID 57592, an outgoing interference study was executed. It was discovered that according to Longly-Rice methods approved by the OET, that stations WFXS, Wittenberg, WI would receive lethal interference if W31BA was to continue operation on channel 31. After thorough searching, channel 39(T) was found to cause no lethal levels of interference to stations in either the USA or Canada. Thus, Three Angels Broadcasting Network respectfully requests that the Commission look favorably on this application.
