

# TECHNICAL STATEMENT RADIO MULTIPLE OWNERSHIP ANALYSIS

This statement and the attached figures were prepared on behalf of a licensee subsidiary of Clear Channel Communications, Inc. ("CCC"). The licensee proposes to acquire the facilities of WOR(AM), New York, NY. A multiple ownership analysis was prepared considering the following radio stations under present or proposed common ownership, time brokerage or joint sales:<sup>1</sup>

Table 1: Proposed Commonly Owned, Brokered or Jointly-Sold Stations Studied and Associated Arbitron Metro<sup>2</sup> Information

Calls	Fac ID	Band	Community	Geographic Arbitron Market	Declared Arbitron Market
<b>WOR</b>	<b>7710</b>	<b>AM</b>	<b>New York</b>	<b>New York, NY</b>	<b>New York, NY</b>
WAXQ	23004	FM	New York	New York, NY	New York, NY
WHTZ	59953	FM	Newark	New York, NY	New York, NY
WKTU	6595	FM	Lake Success	Nassau-Suffolk, NY	New York, NY
WLTW	56571	FM	New York	New York, NY	New York, NY
WWPR-FM	6373	FM	New York	New York, NY	New York, NY
WKCI-FM	11930	FM	Hamden	New Haven, CT	New Haven, CT
WAVZ	11920	AM	New Haven	New Haven, CT	New Haven, CT
WELI	11933	AM	New Haven	New Haven, CT	New Haven, CT
WWYZ	74205	FM	Waterbury	Non-Metro	Hartford-New Britain-Middletown, CT

Since certain of these stations have overlapping principal community contours (5 mV/m for AM stations, 3.16 mV/m for FM stations), or are located in, or home to, the same Arbitron Metro market, an ownership study has been prepared in accordance with the Federal Communications Commission's local radio ownership rule.<sup>3</sup>

CCC does not have an attributable interest in any other station with a principal community contour that overlaps or intersects the principal community contour of WOR(AM) which is not located in an Arbitron market, or regardless of contour overlap, which is located in the same Arbitron Metro<sup>4</sup> as WOR(AM). The community of license of WOR(AM) is located within and is reported by BIA as being "Home" to the New York, NY Metro. Contour overlap of the station to be acquired, as depicted in *Figure 2*, also occurs with commonly-owned stations whose communities of license are located in Arbitron

<sup>1</sup> None of the following stations are attributable by virtue of a time brokerage agreement or joint sales agreement.

<sup>2</sup> Arbitron data presented herein is obtained from BIA's "Media Access Pro."

<sup>3</sup> See 47 C.F.R. § 73.3555(a).

<sup>4</sup> A station is considered to be "located in an Arbitron Metro" if the station's community of license is located within the boundaries of that Metro, or, the station is listed as "Home" to that Metro by BIA.

Metro markets, and commonly owned stations whose communities of license are located outside any Arbitron Metro market.

#### Arbitron Market Study

WOR(AM) is reported by BIA as being "Home" to the New York, NY Metro. This proposal is in compliance with the local radio ownership rules for that Arbitron Metro, as evidenced by *Figure 1* below:

#### Interim Contour-Overlap Analysis

Because the stations principal community contour overlaps or intersects the principal community contour of an attributable station with a community of license which is located outside any Arbitron Metro, an interim contour-overlap analysis is also set forth in this statement.

#### Interim Contour-Based Radio Markets

A "radio market" under the interim contour-overlap method is the area encompassed by the mutually overlapping principal community contours of the stations under common-ownership or attribution. Here, such mutually overlapping contours form one ("1") "radio market" for interim contour-overlap analysis under the Commission's rules as shown below.

#### Contour Market

Radio Market	
2-FM 3-FM	
WKCI-FM	FM
WWYZ	FM
WOR	AM
WAVZ	AM
WELI	AM

#### Count of Stations in Defined Markets

The number of radio stations in a contour-overlap "radio market" is determined by counting the operating stations having principal community contours which overlap or intersect the principal community contours which define the radio market, plus the subject commonly owned or attributable stations, excluding any stations whose transmitter sites are further than 92 kilometers from the perimeter of mutual overlap, and excluding any commonly owned or attributable stations that do not serve to define the market.

In the interim contour-overlap "radio market" studied herein, there are the required count of radio stations, including the subject co-owned stations, which overlap or intersect with the defined "radio market." *Figure*

3 and Figure 4 are a map and tabulation of the radio stations identified in the contour-overlap "radio market".

Only known licensed, operating radio stations were included in this tabulation. Distances to contours for AM stations were predicted using the antenna patterns as identified in the Commission's AM database and the appropriate Ground Wave Field Strength versus Distance Graph of 47 C.F.R. § 73.184. Ground conductivities were obtained from FCC Figure M3. Distances to the FM contours were determined based on the method of 47 C.F.R. § 73.313. Terrain data was derived from the N.G.D.C. 30 second computer database for each of the FM stations using radials spaced every 45 degrees of azimuth.

#### Conclusions

In the Arbitron Metro market studied herein, there are at least 45 radio stations, including the subject commonly-owned 1-AM / 5-FM stations, which are home to the New York, NY Metro. This proposal does not affect the existing number of commonly-owned stations in the subject Arbitron Metro.

In the interim contour-overlap "radio market" studied herein, 45 radio stations, including the subject commonly-owned 2-AM / 3-FM stations.

Based on the above, it is concluded that the proposed modification complies with Section 73.3555(a) of the FCC Rules.

Respectfully submitted,

Troy G. Langham  
FCC Engineering Supervisor  
August 15, 2012
