Re: WBHR(AM), Sauk Rapids, MN
Tri-County Broadcasting Inc.
Facility Identification Number: 26980
License application: BMML-20121005AGV

Dear Mr. Hoppe:

Our review of the subject license application shows the following deficiencies.

1. FCC Form 302 shows tower 1 as the east tower in the WBHR(AM) array with an antenna structure registration number (ASRN) of 1024199, and the west tower as tower 3 with an ASRN of 1024201. Based on the coordinates in the FCC's ASRN database, the eastern most tower has an ASRN of 1024201 and the western most tower has an ASRN of 1024199. These ASRNs will need to be corrected.
2. Page 10 of WBHR(AM)'s engineering report shows the daytime tower drive information, however the field phases for towers 2 and 4 have been reversed. Thus, the application will need to be amended based on the correct field phases for towers 2 and 4.
3. The applicant provided the reference field strength measurements as required in Section 73.151(c)(3). However, a description of the meter that was employed in making the measurements must be provided, along with the meter's latest calibration date.

Further action on the subject license application has been withheld until the applicant submits an amendment addressing the deficiencies described above. Failure to respond within 30 days from the date of this letter may result in dismissal of the application pursuant to 47 CFR Section 73.3568(a)(1).

Sincerely,

Jerome J. Manarchuck
