Hi Lois & Mike --

I have been going thru the 150+ emails that were sent to me over the weekend, and I just got to this email.

Please let me know about K220HA so I can respond to Don Mussell.

Thanks.

Cary

Subj: re: K220HA interference

Hi Cary,

One of my clients (KMNO, Mana`o Radio, Wailuku, Maui) signed on their new transmitter a couple of weeks ago. They are authorized to operate on 91.7 mhz.

They are receiving complaints about interference from K220HA, and would like to know when Calvary Chapel intendeds to vacate the channel. The CP for changing the frequency was granted a while ago.

Personally, I would want to avoid a complaint, so if you can let me know what the plans might be for resolving this.

Thanks,

Don Mussell

On 7/20/13 we attempted to construct the CP. Our plan was to re-broadcast K205EB. We used a Scala CLFM-RX receive antenna with a Sony digital FM receiver to try to locate K205EB. After 1/2 a day of trying different antenna locations, we were unsuccessful. 88.9 is completely covered at the site elevation by KOPO-LP in Paia, HI. We also tried to receive other CSN translators on Oahu and Hawaii (Big Island) without success.
