In Support of an

Application for a

Construction Permit

WEAS-FM

Springfield, Georgia

Channel 226C1 – 93.1 MHz

ERP: 100.0 kW(H&V)

HAAT: 299.0 m

May, 2004

General

As broadcast technical consultants doing business as Reynolds Technical Associates (“RTA”), we have been authorized by Cumulus Licensing LLC (herein referred to as “Cumulus” as well as “The Applicant”), licensee of WEAS-FM, Springfield, Georgia, to conduct engineering studies and prepare the engineering portion of an application for a construction permit.

The purpose of this application is to bring WEAS-FM into compliance with MB Docket No. 03-119, in which a change in the city of license was requested.

This instant application is seeking to change the city of license to Springfield, Georgia.

No other changes are being requested.

The Proposed Site
(Exhibits E, Figure 1 through 4)

Exhibit E, Figure 1 is a channel spacing study for the proposed facility, showing the facilities considered.

Exhibit E, Figure 2 is the terrain averaging and contour study for the proposed change.

Exhibit E, Figure 3 is the service contour map displaying the FCC F(50,50) 70 and 60 dBu contours of the proposed facility demonstrating that the 70 dBu contour encompasses the city of license.

Exhibit E, Figure 4 is a vertical sketch of the existing tower to be used as the proposed antenna supporting structure. The registration of the structure is 1032657.

The distance to the blanketing contour is calculated to be 0.965 kilometer (0.600 mile).

Human Exposure
(Exhibit E, Figure 5)

The proposed FM facility was evaluated in terms of potential radiofrequency radiation exposure at ground level in accordance with FCC guidelines for maximum permissible exposure.

The Applicant's proposed FM broadcast station is to be placed on an existing multiple-transmitter site tower. Therefore, a complete environmental assessment has been considered. Each of those facilities and the results of the assessment are listed in Exhibit E, Figure 5.

An agreement is in effect, that if anyone is required to climb the tower, all facilities on the tower will either reduce power or cease operation, so as to prevent hazardous exposure to radiofrequency radiation.

Environmental Impact
(No Exhibits)

A grant of the proposed construction would not constitute a major action as defined in the Commission's Rules and Regulations.

During operation, the facility will produce no chemical or significant thermal pollution, and no ionizing radiation will be generated. Areas of high intensity radiofrequency fields will be confined to the immediate area of the transmitting antenna, far above the ground and away from any human and wildlife population.

The area is not officially designated as a wilderness area or wildlife preserve and is not pending consideration. The area has no significant value in American history, architecture, archaeology, or culture, which is listed in the Register of Historic Places, and it is not eligible for listing. It is not recognized either nationally or locally for special scenic or recreational value.

Conclusion

This statement/application has been prepared for The Applicant by utilizing the latest available information, cross-checked with the Federal Communications Commission and other sources. Therefore, it is submitted that the proposed is in compliance with the Commission's Rules and Regulations and other sources. Therefore, it is submitted that the engineering data compiled and demonstrated herein for the proposed is in compliance with Commission's Rules and Regulations at the time of this application's filing date. We welcome the opportunity to discuss with the staff of the Federal Communications Commission the engineering data contained in this application. Should any questions arise concerning the information, please contact us.

The following pages are exhibits prepared and assembled in support of the proposed.

Lee S. Reynolds
12585 Old Highway 280 East, Suite 102

Statement of the Consultants

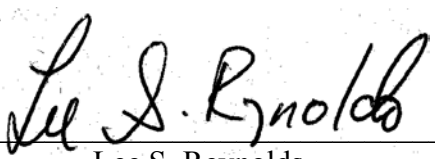

The instant engineering statement (amendment to a pending application) was prepared for Cumulus Licensing LLC (“The Applicant”) and supports an application for a construction permit of WEAS-FM, Springfield, Georgia. It was developed by RTA and may not be used for purposes other than submission to the Commission by The Applicant.

It may not be reproduced in its entirety, or in part, by anyone (other than from the Commission) without the written consent of RTA.

It is prepared for The Applicant under contractual agreement, and its certification by RTA is used accordingly. If The Applicant fails in its contractual obligation, RTA reserves the right to withdraw its certification.

The information in this application is compiled from the most recent Commission and outside data. RTA is not responsible for errors resulting from incorrect data or unpublished rule and procedure changes.
