B Communications Joint Venture

KBNB-LP, San Antonio, TX: Flash-Cut to Digital (Channel 10D)

**EXHIBIT 11**

**LPTV FLASH-CUT MINOR MODIFICATION – INTERFERENCE STUDIES**

1. B Communications Joint Venture ("Applicant") is the licensee of KBNB-LP, San Antonio, TX, analog channel 10(z). By this digital "flash-cut" minor modification application, Applicant proposes to operate on channel 10 as digital from its recently authorized transmitter site (N 29° 26' 29"; W 98° 30' 22"; NAD 27). Because there is no proposed channel change, and given that the licensed and/or authorized and proposed service contours overlap, this filing qualifies as a minor modification application.

2. Attached as Figure 1 are the OET-69 study results for the proposed facility (as the referenced station) as determined on a Sun Computer using a Solaris (Unix-based) operating system and using the same OET-69 software as developed for use by the FCC. (According to the software developer, the program used herein provides identical results as the FCC's OET-69 processing program.) As demonstrated by Figure 1, except for those stations also licensed, authorized or proposed by the applicant, or those stations that have consented to predicted interference from this proposal, the proposed facility adequately protects all other US broadcast stations as required by the FCC Rules. All studies are conducted in accordance with current FCC Rules and Regulations.

3. The applicant accepts any interference that is predicted to exist to the proposed facility by any licensed, authorized or previously proposed primary TV station. The applicant also accepts any interference that is predicted to exist to the proposed facility by any licensed or authorized secondary TV station, or by any secondary TV facility that is given preferential status by the FCC over the Applicant's herein proposed facility.
