

Robert Hensler, Vice President of Engineering for Colorado Public Radio, which manages Station KVOD, 88.1FM for PRC Denver-I, LLC, hereby certifies as follows:

On July 23, 2010, field strength measurements were taken in the area adjacent to the transmitter site to determine if there are any locations that exceed Commission guidelines for human exposure to RF fields. The measurements were made by me using a Holaday HI-2200 RF survey meter. All readings were found to be within FCC requirements for public exposure limits.

Based on this survey, it is determined that KVOD's operation as authorized under construction permit File No. BPED-20091106AEN will not cause human exposure to levels of radio-frequency radiation in excess of the limits in Section 1.1310 of the FCC Rules.
