

Exhibit B-14

70 dBu Coverage of Anchorage

Anchorage is a Borough of the State of Alaska, and is extensive in area. Its boundaries are shown in Exhibit B-14. All existing Anchorage FM stations, including KMXS, have required waiver of §73.315(a) of the Commission's Rules. Such waiver is fully justified by the practical impossibility of providing the entire Borough with 70 dBu coverage. This proposal provides 70 dBu coverage to 84.6% (191,405 of the 226,338 residents) of the population of the Anchorage Borough, and to 70% of the area contained in the Anchorage Urbanized Area. Continued waiver of §73.315(a) is respectfully requested to the extent required.
