

Portions of Pending Application Revised By Amendment

This amendment to the Form 349 Minor Change Application BPFT-20140325ABS is being filed to change the K295CH transmit antenna to vertical polarization. This change is necessary to demonstrate that the K295CH proposed facility is mutually exclusive to the licensed K295CH facility. Exhibit 13-E includes a map that demonstrates the required contour overlap.

The following changes were made to the application itself:

Section III-A Engineering

8. Height of Radiation Center Above Ground Level:
(This was changed from Horizontal to Vertical Polarization.)
9. Effective Radiated Power:
(This was changed from Horizontal to Vertical Polarization.)

The following exhibits have been modified:

Exhibit 12: Technical Narrative

Exhibit 17-A: Compliance with RF Exposure Limits & Section 106

Exhibit 17-B: FM Model for Windows
