

EXHIBIT 12 IN SUPPORT OF NEW LPFM STATION FOR  
ELK CREEK LUTHERAN CHURCH

The only two co-channel stations to our proposal are at a distance from this location and are commercial stations. Neither station operates or can operate a translator within the area that our proposal would cause interference to. There are no other translators or boosters with input frequencies that are co-channel or adjacent channel to our proposal within an area that would be impacted by the operation of this LPFM station as proposed.
