

**Environment Impact & RFR Compliance Statement**

FM translator K255BE is located at an established communications site that is in compliance with all environmental impact requirements.

This minor change application specifies a change in the antenna only. K255BE operates with an ERP of 0.062 kW (H&V) at an antenna COR AGL height of 142 meters. For a worst case estimation at 2 meters above ground level the RFR is no more than 0.1% of the general population/uncontrolled MPE limit.

There are three other licensed FM translators at the site and one FM translator CP modification application. For a worst case estimation at 2 meters above ground level the RFR percentage of the general population/uncontrolled MPE limit of each is as follows:

K270BK (LIC), 0.250 kW (H&V) ERP, 130 meters - 0.5%  
K300CY (LIC), 0.250 kW (H&V) ERP, 130 meters – 0.5%  
K289CC (LIC), 0.250 kW (H&V) ERP, 118 meters – 0.6%  
K240ED (CP MOD), 0.062 kW (H&V) ERP, 142 meters – 0.1%

The combined facilities including K255BE will contribute no more than 1.8% of the general population/uncontrolled RFR MPE limit, therefore K255BE is in compliance with all RFR requirements.

RFR hazard warning signs are posted at the site and the site has restricted access to only authorized personnel. The applicant certifies that in cooperation with other users of the site all authorized personnel will be protected from RFR exposure in excess of FCC guidelines while accessing any controlled exposure area, including the tower, by either reducing power or ceasing operations. Information pertaining to the contact representative of the facility will be posted.
