COVERING EXHIBITS 11-18  
APPLICATION FOR MINOR MODIFICATION OF CONSTRUCTION PERMIT  
FCC FILE NO. BMJP-20050114AEE  
SYCAMORE, ILLINOIS  
1180 KHZ 0.9KW DAY  
FACILITY ID: 16545  
TO ADD NIGHT TIME OPERATION AND  
CORRECT DAYTIME TOWER COORDINATE TYPO

GENERAL

DeKalb County Broadcasters, Inc. (DCB) has prepared this engineering report, FCC Form 301, and the attached engineering exhibits in support of an Application to Modify Construction Permit (FCC BMJP-20050114AEE) to add night time operation at 0.001 Kw and correct daytime tower coordinates.

It was discovered in preparing this night time application that the daytime antenna coordinates on the current WSQR 1180 kHz construction permit (BMJP-20050114AEE) are incorrect. In researching the issue we have found that BMJP-20040130BCR shows the coordinates of 42-00-24 88-40-40 which are identical to WSQR's licensed coordinates authorized in BL-19960313AB. In BMJP-20050114AEE, the Form 301 Tech Box shows 42-0-24 88-40-4, the "0" was inadvertently omitted after the 4. The CP issued in BMJP-20050114AEE shows 42-00-24 88-40-04. It should be corrected to show 42-00-24 88-40-40. All calculations for maps, contours, population and city grade coverage submitted with BMJP-20050114AEE are based on the licensed WSQR tower coordinates of 42-00-24 88-40-40.

It is respectfully requested that the antenna coordinates for the daytime CP be corrected to reflect 42-00-24 88-40-40 as shown in this application. This is the currently licensed WSQR antenna site, see BL-19960313AB. The applicant proposes to use its licensed tower site.

Currently WSQR operates on 1560kHz as a daytime station. Utilizing the same transmitter site, same tower, ground system, transmitter building WSQR has been issued a Construction Permit BMJP-20050114AEE to change frequency to 1180 kHz operating with 0.9kW days only. This application is to request WSQR be granted night authority on 1180 kHz at 0.001 Kw during night time hours. WSQR proposes to use the daytime facilities specified currently in use. No site photos, aerials, plats have been included as this is the existing WSQR transmitter site.

WHAM, Rochester is the 1A station operating at night on 1180 kHz. Attached you will find the DataWorld study on "Permissible Radiation Limits" for 1180 kHz at night. WHAM is the controlling night time protection requirement WSQR has utilizing it's non-directional daytime antenna system. The maximum radiation level is: 7.9 mv/m at 79 degrees T North between 39.5 and 53.8 degrees Theta to 92 degrees T North between 39.5 and 53.9 degrees Theta. Utilizing the current daytime radiator of 80.78 degrees at 1180 kHz, input power of 0.00133 Kw would radiate 7.894 mv/m at 39.8 degrees and 5.841 mv/m at 53 degrees. Applying the FCC rules for rounding in 73.150 and 73.160 the power we are requesting is 0.001 Kw.

No persons live in the 1,000 mv/m contour. No city coverage map is included as none is required for Daytime operation of less than .025kW at night.

## ENVIRONMENTAL EFFECTS

The proposed operation is in compliance with OET Bulletin No. 65. Full protection is afforded by the proposal. Workers and the general public are not exposed to high radiation at station WSQR. The tower is in a rural location, properly enclosed by a locked security fence, and RF warning signs are posted. WSQR will operate with transmitter power of 900W Day, 0.001kW Night. The shortest distance between the fence and the tower is over 10 feet. The station is in compliance with the radio frequency protection guides of the American National Standards Institute, and OET Bulletin 65, including the reduction or cessation of transmitter power when persons have access to the fenced tower area. The station complies with Section 1.1307 of the commission's rules, with the sole exception that the transmitter site is located in a flood plain, however, the tower site has been at this location since the station first went on the air in 1981. The licensee has never known it to have been a source of controversy in the local community due to it being located in a flood plain or to have caused any adverse impact on the community. Grant of the station's application will not result in a significant environmental impact.

**United States of America**  
**FEDERAL COMMUNICATIONS COMMISSION**  
**AM BROADCAST STATION CONSTRUCTION PERMIT**

Authorizing Official:

Official Mailing Address:

DEKALB COUNTY BROADCASTERS, INC.  
1 BROADCAST CENTER  
PLANO IL 60545

Son Nguyen  
Supervisory Engineer  
Audio Division  
Media Bureau

Grant Date: November 02, 2005

Facility Id: 16409

Call Sign: WSQR

Permit File Number: BMJP-20050114AEE

This permit expires 3:00 a.m.  
local time, 36 months after the  
grant date specified above.

Permit to change frequency from 1560 to 1180 kHz.

Subject to the provisions of the Communications Act of 1934, as amended, subsequent acts and treaties, and all regulations heretofore or hereafter made by this Commission, and further subject to the conditions set forth in this permit, the permittee is hereby authorized to construct the radio transmitting apparatus herein described. Installation and adjustment of equipment not specifically set forth herein shall be in accordance with representations contained in the permittee's application for construction permit except for such modifications as are presently permitted, without application, by the Commission's Rules.

Commission rules which became effective on February 16, 1999, have a bearing on this construction permit. See Report & Order, Streamlining of Mass Media Applications, MM Docket No. 98-43, 13 FCC RCD 23056, Para. 77-90 (November 25, 1998); 63 Fed. Reg. 70039 (December 18, 1998). Pursuant to these rules, this construction permit will be subject to automatic forfeiture unless construction is complete and an application for license to cover is filed prior to expiration. See Section 73.3598.

Equipment and program tests shall be conducted only pursuant to Sections 73.1610 and 73.1620 of the Commission's Rules.

Hours of Operation: Daytime

Average hours of sunrise and sunset:  
Local Standard Time (Non-Advanced)

Callsign: WSQR

Permit No.: BMJP-20050114AEE

Name of Permittee: DEKALB COUNTY BROADCASTERS, INC.

Station Location: SYCAMORE, IL

Frequency (kHz): 1180

Station Class: D

Antenna Coordinates:

Day

Latitude: N 42 Deg 00 Min 24 Sec

Longitude: W 88 Deg 40 Min 04 Sec

Transmitter(s): Type Accepted. See Sections 73.1660, 73.1665 and 73.1670 of the Commission's Rules.

Nominal Power (kW): Day: 0.90

Antenna Mode: Day: ND

(DA=Directional Antenna, ND=Non-directional Antenna; CH=Critical Hours)

Antenna Registration Number(s):

Day:

| Tower No. | ASRN |       |
|-----------|------|-------|
| 1         | None | 58.91 |

Non-Directional Antenna: Day

Radiator Height: 57 meters; 80.78 deg

Theoretical Efficiency: 299.6 mV/m/kw at 1km

Special operating conditions or restrictions:

- 1 Permittee shall install a type accepted transmitter, or submit application (FCC Form 301) along with data prescribed in Section 73.1660(b) should non-type accepted transmitter be proposed.

Special operating conditions or restrictions:

- 2 After a license has been granted to cover this construction permit, licensee may submit the information required pursuant to 47 CFR Section 73.99(e) if a Presunrise (PSRA) and/or Postsunset Authorization (PSSA) is desired.
  
- 3 A license application (FCC Form 302) to cover this construction permit must be filed with the Commission pursuant to Section 73.3536 of the Rules before the permit expires.
  
- 4 Licensee shall be responsible for satisfying all reasonable complaints of blanketing interference within the 1 V/m contour as required by Section 73.88 of the Commission's rules.
  
- 5 Permittee will abandon the 1560 kHz frequency which WSQR, Sycamore, Illinois, currently operates, prior to or simultaneously with the filing of FCC Form 302 application for license.
