

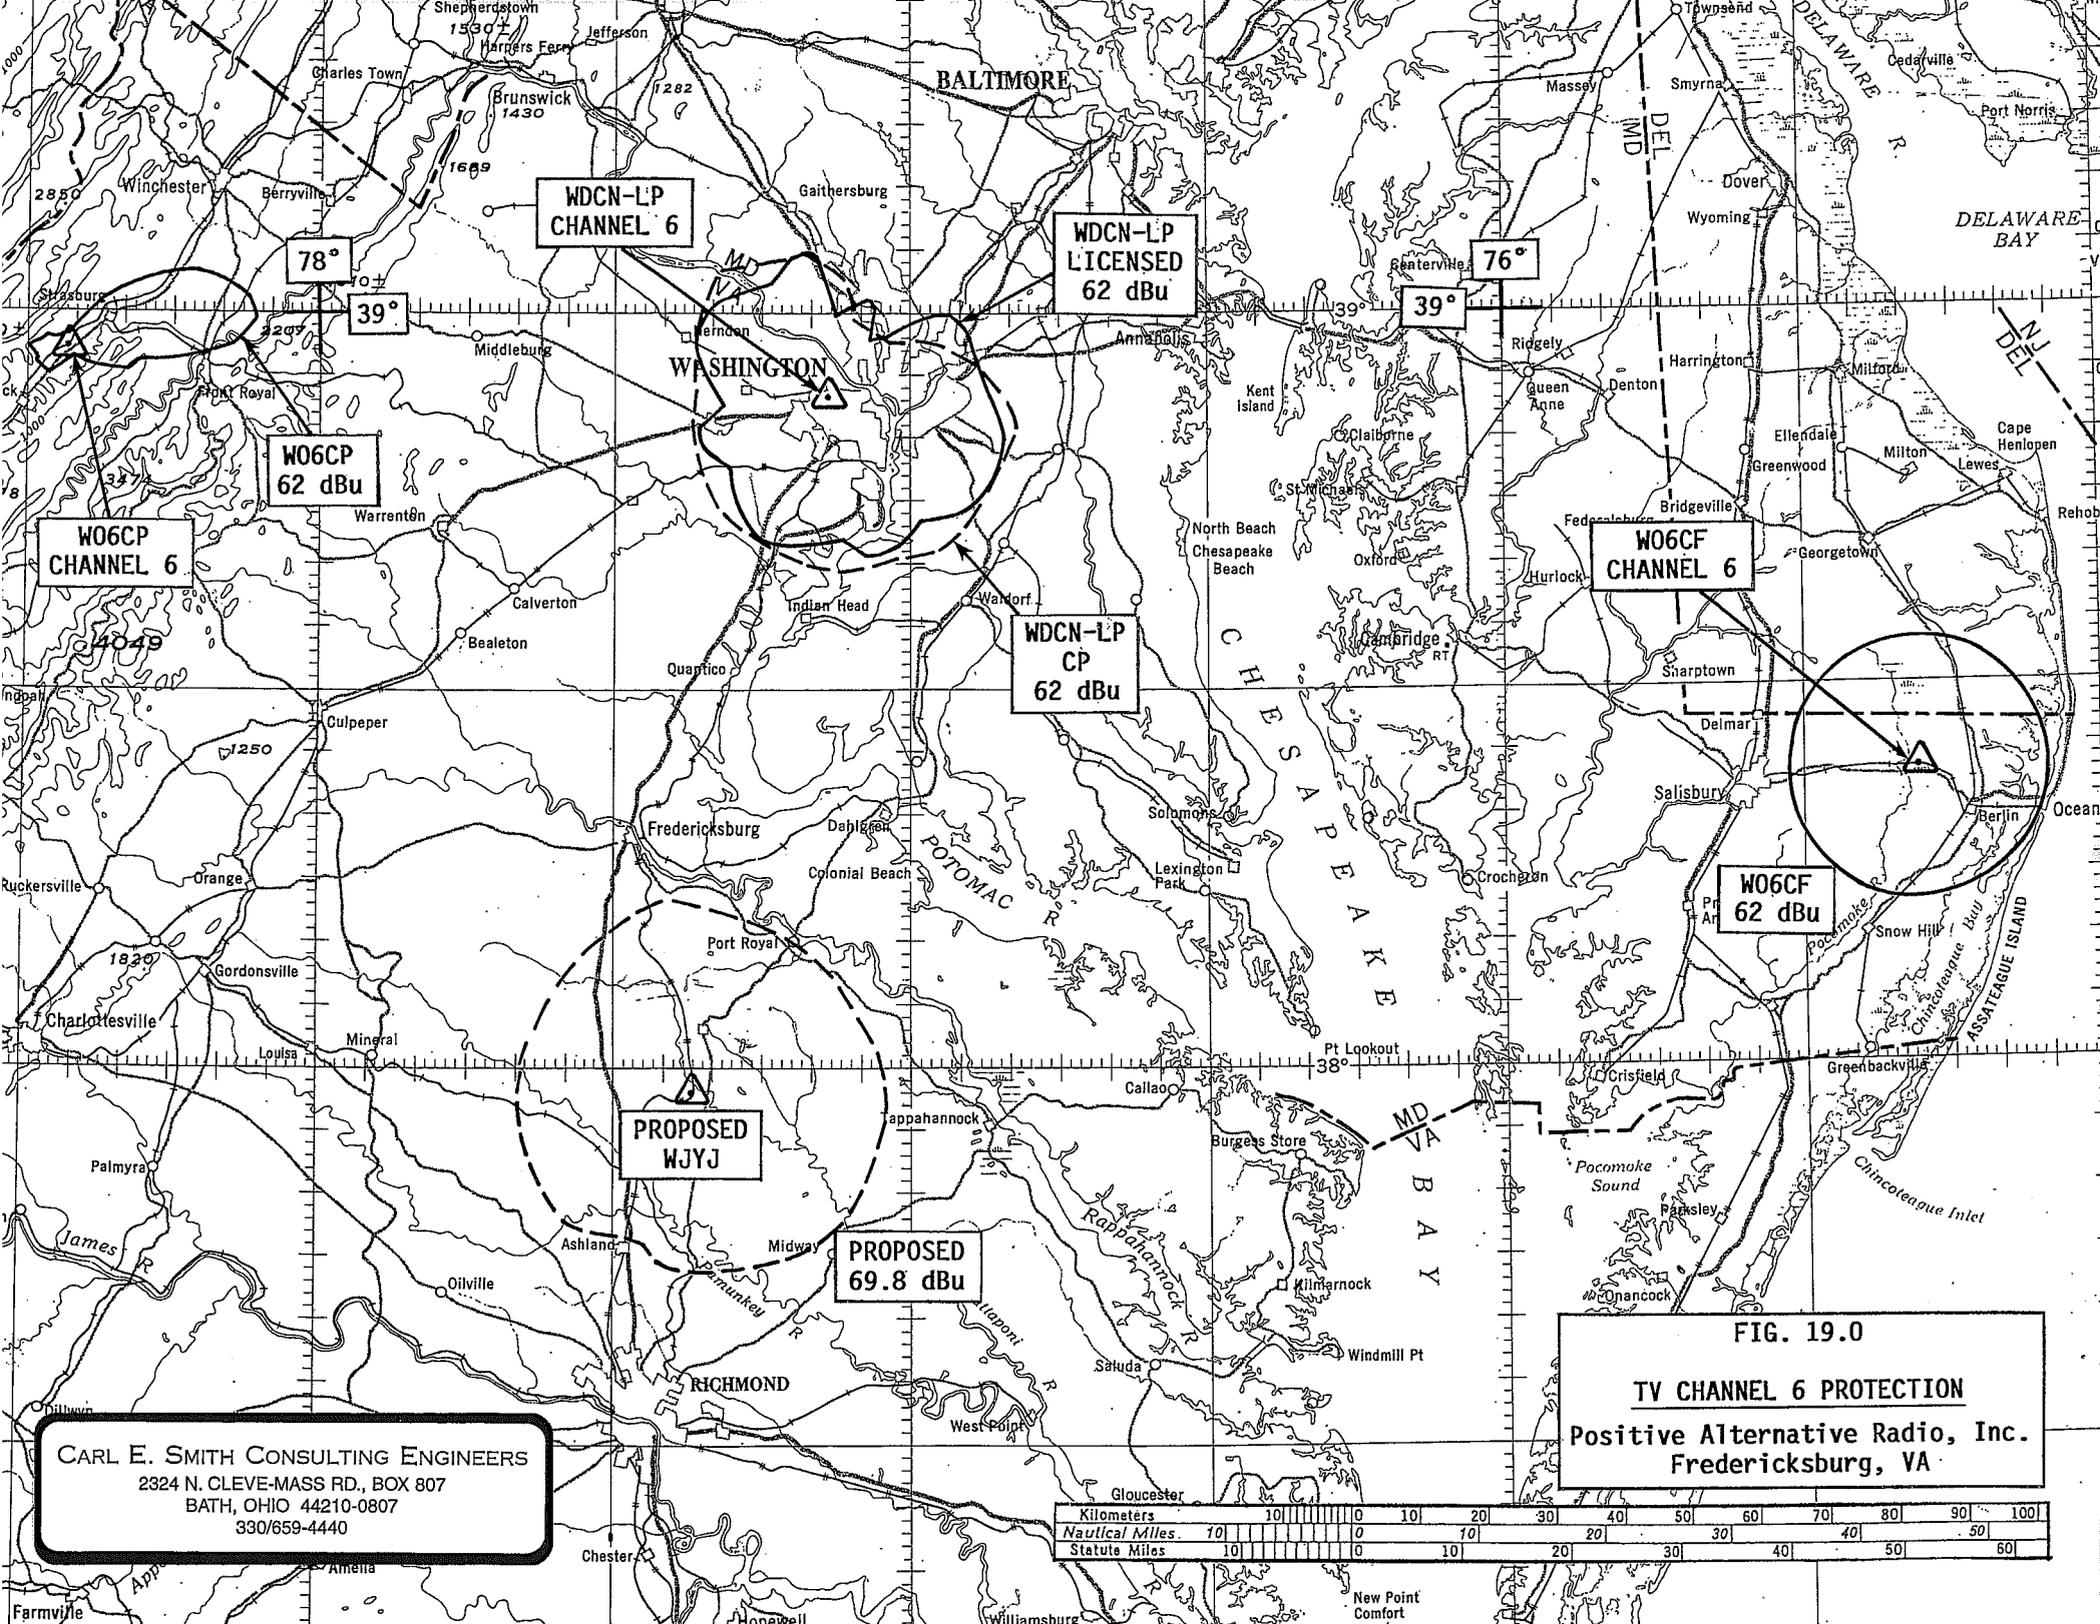

EXHIBIT 19  
(Page 1 of 2)

TV CHANNEL 6 PROTECTION  
Positive Alternative Radio, INC.  
Fredericksburg, VA

The protection standards with respect to TV stations operating on Channel 6 are outlined in Section 73.525 of the FCC Rules. This rule section states that stations operating on Channel 213 are required to give protection consideration to all Channel 6 TV stations located within 193 kilometers of their transmitter sites. In this case there are three Channel 6 TV stations are located within this distance from the WJYJ site:

W06CF - Salisbury, MD  
WDCN-LP - Fairfax, VA  
W06CP - Mt. Olive, VA

Figure 19.0 is a map exhibit depicting the predicted 69.8 dBu interfering contour for the proposed modified WJYJ facilities in relation to the predicted 62 dBu protected contours for these three Channel 6 TV facilities. As shown in this figure, there will be no overlap between these contours. Based upon this information, the proposed WJYJ facilities will provide the required protection to all three of these Channel 6 TV facilities.
