

**FILL-IN EXHIBIT**  
**K299BL (FID # 158270) – TULSA, OK**  
**K299BP (FID # 157276) – COWETA, OK**  
**K300CY (FID # 157502) - BROKEN ARROW, OK**

The instant application is one of two simultaneous filed assignment applications which identify Tyler Media L.L.C. (“Tyler”) as the proposed assignee of three FM translator authorizations. Tyler intends to rebroadcast the signal of commonly-owned KTUZ, Claremore (FID #50215) on each translator.

All three translators are subject to simultaneously-filed engineering applications seeking minor modifications to the technical parameters of each facility. It is anticipated that the engineering applications will be granted prior to consummation of the transactions contemplated by the assignment applications.

The following study demonstrates that the 60 dBu contour of each proposed FM translator is contained entirely within both the 2 mV/m daytime contour of KTUZ, and a 25-mile radius centered at the transmitter site of KTUZ.
