

Installation Engineering Statement  
8/27/2013

I, James A. Turvaville, Director of Engineering for WAY Media, do certify that the PSI antenna for KXWA Auxiliary facility as outlined in Construction Permit BMXPH-20120119ABL was assembled and attached to the mounting structure by Galvanized Endeavors under the direct supervision of my staff and was done so in exact compliance with the instructions provided by the manufacturer.

When the surveyor from Woolpert was present on site, my staff was present and made the final adjustment of the orientation of the antenna under the direction of the licensed surveyor. All of the instructions for the assembly and orientation of the antenna as provided by the manufacturer were followed precisely.

RF Readings were made by my staff utilizing the calibrated equipment noted in the separate statement.

My experience with the supervision of the installation of directional FM antennas is a matter of Commission Record.

Respectfully,

A handwritten signature in black ink, appearing to read "Jim Turvaville", is written over a light gray rectangular background.

James A. Turvaville  
Director of Engineering & I.T.
