

To Mr. Daniel Sparks  
Radio Coordinator  
Organization for Northern Development  
1325 Primrose St.  
Anchorage Alaska, 99508

Dear Mr. Sparks;

It has come to our attention that the construction permit for a new LPFM FM station has been activated on its assigned frequency of 104.9. Our company represents a full service station, KMOV, 104.9, Sterling Alaska. The new LPFM station is on the same frequency, and is within the coverage area of KMOV. In other words, the new station is causing interference to KMOV. As LPFM is a service secondary to KMOV, we must request your station shut down.

Please acknowledge receipt of this letter, and inform us that the LPFM station has ceased operation. You may contact me by email [mike@tatibroadcasting.com](mailto:mike@tatibroadcasting.com), by mail Tati Broadcasting LLC 4700 Business Park Boulevard Building E Suite 44 Anchorage, Alaska 99503 or by telephone 907-344-4451.

Thank you for your attention to this matter.

  
Mike W. Robbins  
Managing Partner  
Tati Broadcasting LLC
