

TECHNICAL STATEMENT  
WQYZ(FM) FACILITY ID 24513  
CAPSTAR TX LIMITED PARTNERSHIP  
RADIO MULTIPLE OWNERSHIP ANALYSIS -- 11/12/2003

This statement and the attached figures were prepared on behalf of Capstar TX Limited Partnership ("Capstar", a licensee subsidiary of Clear Channel Communications, Inc. ("Clear Channel")). Capstar proposes to acquire the license of WQYZ(FM). A multiple ownership analysis was prepared considering the following radio stations under present or proposed common ownership or time brokerage:

Table 1: Proposed Commonly Owned or Controlled Stations Studied

Call Sign	Facility_id	City	State
WQYZ	24513	OCEAN SPRINGS	MS
WBUV	29687	MOSS POINT	MS
WBUV	29687	MOSS POINT	MS
WKNN-FM	61367	PASCAGOULA	MS
WMJY	61368	BILOXI	MS

Since certain of these stations have overlapping principal community contours (5 mV/m for AM stations, 3.16 mV/m for FM stations), an ownership study has been prepared in accordance with the Federal Communications Commission's multiple ownership rules<sup>1</sup>.

Clear Channel does not have an attributable interest in any other station with a principal community contour that overlaps or intersects the principal community contour of WQYZ(FM).

Radio Markets

The "radio market" applicable to common ownership of the subject stations is defined as the area encompassed by the mutually overlapping principal community contours of the proposed commonly owned stations. These mutually overlapping contours form one "radio market" for analysis under the Commission's rules.

Radio Market is defined by the mutually overlapping principal community contours of WQYZ(FM)(FM) (as proposed in the accompanying application), WBUV(FM) License and CP, WKNN-FM, and WMJY(FM). The predicted principal community contours of these stations (4 FM) are shown in *Figure 1*.

---

<sup>1</sup> See 47 C.F.R. § 73.3555.

### Count of Stations in Defined Market

The number of radio stations in a "radio market" is determined by counting the operating, commercial stations having principal community contours that overlap or intersect the principal community contours that define the radio market, plus the subject commonly owned or controlled stations.

In the Radio Market studied herein, there are over 16 radio stations, including the subject co-owned stations, that overlap or intersect with the defined "radio market." *Table 1* is the tabulation of the radio stations identified in the market and *Figure 2* is a map representing those stations contours. For simplicity of analysis only those stations that overlap or intersect station WQYZ(FM) are listed.

Only known licensed, operating commercial stations were included in this tabulation. Distances to contours for AM stations were predicted using the antenna patterns as identified in the Commission's AM database and the appropriate Ground Wave Field Strength versus Distance Graph of 47 C.F.R. § 73.184. Ground conductivities were obtained from FCC Figure M3. Distances to the FM contours were determined based on the method of 47 C.F.R. § 73.313. Terrain data was derived from the N.G.D.C. 30 second computer database for each of the FM stations using radials spaced every 10 degrees of azimuth.

Based on the above, it is concluded that the proposed combinations comply with § 73.3555(a) of the FCC Rules.

Sincerely,

Troy G. Langham  
FCC Engineering Specialist  
Capstar TX Limited Partnership
