

Engineering Exhibit  
WYYY (FM) Facility ID No. 48725  
FCC 301, Minor Change Application

This instant application is being filed at the request of the Commission staff to “correct” the coordinates of station WYYY Syracuse, NY to that of the coordinates for the underlying Antenna Structure Registration.

WYYY (FM) was authorized in excess of paragraph (b) of Section 73.211. This application will make no extension in the presently authorized 1mV/m contour.

While this application does not create or aggravate existing short spacing, it is for a “correction” of more than three seconds latitude, thus the filing of 301/302 “two-step” is necessary.

No new construction or modifications of existing facilities for WYYY (FM) are sought in this application.

A FCC Form 302 is being submitted simultaneously with this FCC Form 301.

The table below indicates all station facilities and allocations to which WYYY (FM) is presently short spaced under FCC 73.207. No new short spacing is created by this application. As indicated in the table, the “new” location for WYYY will reduce all short-spacings. The increase in distances range from 0.05 to 0.17 Kilometer. In no instance will this “move” reduce spacing to any of these facilities and or allocations.

Call sign	State	City	Channel	Status	Present Distance	"New" Distance	73-207 Required Separation	Distance "moved" "- "=" toward station
