Re: Sun Mountain, Inc.  
KYLW (AM), Lockwood, Montana  
Facility Identification Number: 129384  
Special Temporary Authority

Dear Counsel:

This is in reference to the request filed October 10, 2008, and supplemented July 15, 2009, on behalf of Sun Mountain, Inc. ("SMI"). SMI requests extension of the special temporary authority ("STA") granted on April 9, 2008, to operate Station KYLW with temporary facilities.<sup>1</sup> In support of the request, SMI states that, after diligent but initially unsuccessful efforts to locate a new site, it has reached an agreement in principle for acquisition of a new parcel of land. SMI states that, after a formal contract for purchase of the site has been executed, it will prepare and file an application for construction permit.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Our review indicates that the licensee has been prevented from restoring licensed operation due to causes beyond its control and has taken all possible steps to expeditiously resolve the problem. Thus, extension of STA is warranted.

Accordingly, the request for extension of STA IS HEREBY GRANTED. Station KYLW may continue to operate with the following facilities:

Geographic coordinates	45° 43' 34" N, 108° 36' 35" W (NAD 1927)
Frequency	1450 KHz
Hours of operation	Unlimited

---

<sup>1</sup> KYLW is licensed for operation on 1450 kHz with 1 kilowatt daytime and 1 kilowatt nighttime, employing a nondirectional antenna (ND-1-U).

Operating power	0.09 kW
Antenna type	Existing tower
Antenna efficiency	349 mV/m/km/kW
Overall height	91
ASRN	1020874

It will be necessary to further reduce power or cease operation if complaints of interference are received. SMI must notify the Commission when licensed operation is restored.<sup>2</sup> SMI must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR § 1.1310.

This authority expires on **January 20, 2010**.

Sincerely,

Charles N. Miller, Engineer  
Audio Division  
Media Bureau

cc: Sun Mountain, Inc.
