

## **EXHIBIT 1**

The instant application for a minor modification is proposing an increase of Effective Radiated Power only. There will be no other changes.

Applicant submits that this modification will result in coverage that is greater than that approved in the Commission's approval of applicant's previous minor modification as authorized in BMPED 20120816AAA, and subsequently licensed under BLED 20121126AKW and, as such, will result in service to a greater number of persons than was proposed in that modification, both overall and in regard to 1<sup>st</sup> and 2<sup>nd</sup> service, meeting the Special Operating Condition #2 of its license. The service to the Elberton, GA area is, in effect, being upgraded.

The attached 60 dBu coverage map details the increased coverage.
