

Re: KM LPTV of Milwaukee, LLC  
BALTV-20140728AAW

**AMENDMENT**

KM LPTV of Milwaukee, LLC ("KM") amends assignment application BALTV-20140728AAW to reflect the following:

On July 3, 2014, KM requested silent STA authority (BLSTA-20140703AFY). The reason articulated in that request was that the station was going dark due to financial reasons. Financially, KM did not feel that the continued operation of the analog facility (as opposed to the station's proposed digital operations outlined below) was prudent. It should be noted that KM's analog operation of WMKE was losing money. In this regard, gross revenues were minimal. The cost of operation exceeded revenues. In light of the financial plight of the station, it is submitted that the temporary cessation of broadcast operations and full Class A compliance was compelling.

However, since going dark, substantial progress has been made to implement the digital station (BDISDTA-20120319ADQ). Access to the digital antenna site has been secured, and the digital station equipment has been ordered and is being shipped. Completion of construction is anticipated by October 15, 2014. Upon completion of construction, KM plans to immediately file a license application. Notably, completion of the digital construction and the filing of the license for the digital operation is a condition to consummation. So, KM LPTV is not planning to assign a silent station. Furthermore, upon completion of the digital construction, the station will fully comply with Class A operation.
