Location: Fort Wayne, IN

Date: 4/4/2017

The proposed antenna for WXKE at 151m AGL will not adversely affect the performance of the WLAB antenna designed and manufactured by SWR, LP. Based on our analysis sufficient space exists between WXKE (151m) and WLAB (107m). No other antennas may be installed below 115m or above 99m on any tower face or leg. These would adversely affect the performance of the WLAB directional antenna.

Thank you,

Kevin W. Rager  
SWR, LP Engineering
