

APPLICATION FOR STATION LICENSE
CUMULUS LICENSING LLC
KYGA FM RADIO STATION
CH 248B - 97.5 MHZ - 16.0 KW
GOLETA, CALIFORNIA
March 2013

TECHNICAL STATEMENT

This Technical Statement was prepared on behalf of Cumulus Licensing, LLC (“Cumulus”), licensee of radio station KYGA, Channel 248A, Santa Barbara, California. Cumulus holds a construction permit (BPH-20110218ABW) to make minor changes to the facilities of KYGA including a change of city of license from Santa Barbara to Goleta, California. The application seeks a license to cover the outstanding construction permit.

There are several conditions specified on the outstanding construction permit which are addressed herein. Condition #1 states:

“Pursuant to the grant of this construction permit and the authority found in Sections 4(I), 5(c)(I), 303 and 307(b) of the Communications Act of 1934, as amended, and Sections 0.61, 0.204(b) 0.283, 1.420, 73.203(b), and 73.3573 of the Commission’s Rules, the FM assignment IS MODIFIED as follows:

<i>Community</i>	<i>Channel No.</i>
<i>Goleta, CA</i>	<i>Add 248B</i>
<i>Santa Barbara, CA</i>	<i>Delete 248B</i>

Pursuant to Section 316(a) of the Communication Act of 1934, as amended, license BMLH-19831018AA IS MODIFIED to specify operation on Channel 248B at Goleta, CA in lieu of Channel 248B at Santa Barbara, CA”

Cumulus recognizes this condition and to the extent necessary pledges compliance.

Condition #2 states:

“The permittee/licensee in coordination with other users of the site must reduce power or cease operation as necessary to protect persons having access to the site, tower or antenna from radiofrequency electromagnetic fields in excess of FCC guidelines.”

Cumulus recognizes its responsibility in this matter and pledges compliance with this condition.

Condition #3 states:

“Permittee has specified use of the antenna listed below to demonstrate compliance with the FCC radiofrequency electromagnetic field exposure guidelines. If any other type or size of antenna is to be used with the facilities authorized herein, THE AUTOMATIC PROGRAM TEST PROVISIONS OF 47 C.F.R. SECTION 73.1620 WILL NOT APPLY. In this case, a FORMAL REQUEST FOR PROGRAM TEST AUTHORITY must be filed in conjunction with FCC Form 302-FM, application for license, BEFORE program tests will be authorized. The request must include a revised RF field showing to demonstrate continued compliance with the FCC guidelines.

Shively 6810-4 (EPA Type 6), four sections”

Cumulus recognizes this condition, and a Shively 6810-4 (EPA Type 6), four section antenna is installed at KYGA.

Based on the foregoing, it is believed that Cumulus and KYGA are in compliance with the Commission’s rules and the conditions of the permit.
