James L. Ary
Regional Director of Engineering Services
Ohio Region

To Whom it may concern,

As spelled out in the Technical Services Agreement between Secret Communications II, L.L.C. and Clear Channel Broadcasting, Inc, dated February 11th, 2002, I have supervised the install of the Dielectric Directional Antenna as required for the relocation of WKKJ-FM's transmitter site (FCC File No. BMPH-20011120ABH), and confirm that it was installed as per the manufacturers instructions.

Having been a Broadcast Engineer for 34+ years, and in a position for the past 16 years which required me to directly supervise the install of many transmitter sites, I feel that I am adequately qualified to insure the correct installation of directional FM antennas.

Sincerely

Clear Channel Communications Radio Division
