To whom it may concern,

B&H Tower Service, LLC installed one Shively 6510-8-DA bay antenna. The C.O.R. was set at 449 feet. This is an Allied guyed tower located at Sulphur Springs Road, Madison County, Mississippi. The antenna was directed at an azimuth of 17 degrees and installed per directions accompanying the antenna from Shively. Azimuth was verified by a surveyor before the B&H Tower Service crew left the job site.

B&H Tower Service was started in 1994 and has completed hundreds of jobs across the United States for various companies (reference sheet enclosed). We have experience in numerous types of antenna installations including directional and omni-directional FM antennas, pcs, cellular, microwave, television, and two way radio antennas.

The crew leader on the job @ Madison County, Ms was myself, Mark Black, President of B&H Tower Service, LLC

Sincerely,

Mark Black
