

STATEMENT OF EDUCATIONAL PURPOSE FOR PROPOSED PRI-VALUE RADIO STATION

Our radio station will serve as an educational hub on and off the air. We will collaborate with Columbus School of Broadcasting and The Ohio State University to provide training, internships, and unique volunteer experience for students of all ages. Our local radio shows will include topics like public safety, wellness, local history, and life and job skills. Cultural enrichment and digital engagement will be the cornerstones of the educational programming and will allow students to learn more about their community. The key to all of our activities is the goal to use media to allow community members to participate in the public sphere and to make strides to close the digital divide.

Other educational opportunities include:

- digital multimedia training program for K-12 students to engage language, visual, technology, and social skills
- bilingual language training for immigrants and refugees
- adult education (second language acquisition, parenting tips, financial education)
