

Compliance with Canadian Spacing Requirements

The facility contemplated herein is located within 320 kilometers of the border between the United States and Canada.

The proposed facility is located approximately 49.1 kilometers from the Canadian border. The Canadian stations or allocations within 320 kilometers which warrant protection of the proposed operation are as follows:

CFPL-FM 240C1 London, ON

WOHA is short-spaced to the proposed facility by 38.4 kilometers, but as shown in Exhibit 23A, the proposed facility's 48 dBu F(50,10) interfering contour overlaps the CFPL-FM 54 dBu F(50,50) protected contour entirely over water. The CFPL-FM 54dbu(F50-10) interfering contour overlaps the proposed WOHA protected 60dbu (F50-50) contour entirely over water.

No interference will occur over US or Canadian Soil, therefore, this proposal is in compliance with the US-Canadian Working agreement.
