

Second Adjacent waiver Request: At proposed location, the following station have the estimated signal strengths:

Call	COL	CH	DIST	ERP	HAAT	Sig Stregth	Radius
KYSR	LOS ANGELES	CA 254B	61.7	75	325.6	64.2 dBu	61 m
KKLA-FM	LOS ANGELES	CA 258B	59.5	10	541.3	62.2 dBu	77 m
KKLA-FM	LOS ANGELES	CA 258B	59.5	3.74	541.3	56.9 dBu	125 m

Using U/D methodology, the maximum interference radius overlap is 125 m. The interference area contains zero population, as seen below.
