Dear Art,

Thank you for your time today. I appreciate the courtesy.

I was able to contact Charles Dozier, the Director of Engineering for Legend, who was able to confirm that the station was built as authorized, that the radiation center is indeed at 47.3 meters AGL, and that the antenna height information in the first page of the RF Exposure report was indeed a typo.

Please let me know if anything further is needed to update the information.

With best regards,

-gary
