

**MINOR CHANGE APPLICATION**  
**JANIS T. JOBE, EXECUTRIX**  
**WADI RADIO STATION**  
**CH 237A - 95.3 MHZ - 1.5 KW**  
**CORINTH, MISSISSIPPI**  
**December 2001**

**TECHNICAL STATEMENT**

This Technical Statement and attached exhibits were prepared on behalf of Janis T. Jobe, Executrix (“Jobe”), licensee of WADI, Channel 237A, Corinth, Mississippi. Jobe herein proposes to make minor changes in the facilities of WADI by relocating the station, increasing the antenna height above average terrain, and lowering the effective radiated power. As currently authorized, WADI operates with less than a 3.0 kilowatt at 100 meters height above average terrain equivalent Class A facility.

Jobe is proposing to locate the antenna system for WADI on an existing tower. As such, the Federal Aviation Administration was not appraised of this proposal. The tower has been registered with the Commission and assigned tower registration #1200171. At the site proposed in this application, Channel 237A does not meet the Commission’s minimum distance separation requirements to two other FM facilities. The two shortages were created by the change in spacing requirements for Class A stations as outlined in MM Docket #88-375. As such, processing pursuant to §73.213(c) is requested (see Exhibit A for details).

All other necessary documentation used to certify the technical portion of FCC Form 301 have been forwarded to the applicant and is available to the Commission upon request.
