

**Exhibit E-5
Multiple Ownership Study**

This exhibit has been included to demonstrate that the applicant would be in compliance with the provisions of Section 73.3555 of the Commission's Rules. The proposed facility would be co-located with another facility that would be licensed to the applicant. Since both the Paxton and Sutherland facilities would have the same technical parameters, their predicted 70 dBu service contours would be identical. Their contours are indicated by "A" on the attached map.

Although the applicant would have an attributable interest in other facilities licensed to associated corporate entities, none of these other stations are in the vicinity of the proposed facility. In addition, the community of license of the proposed facility lies outside of an Arbitron rated market. As a result, the two co-located facilities would form a market, for which compliance with Section 73.3555 of the Commission's Rules must be demonstrated.

Since two facilities, both of which are in the same service, comprise the market, it is necessary and sufficient to demonstrate that the proponent would control less than fifty percent of the stations in the market. The attached map and facility index demonstrate that there are at least four other facilities whose principal community coverage contour overlaps with the proposed facilities.

Each of these other facilities studied lies within 92 kilometers of the 70 dBu service contour of the proposed facility.

As there are a sufficient number of facilities serving the market, it is respectfully submitted that the proposed facility would be in compliance with the provisions of Section 73.3555 of the Commission's Rules.

Index to Facilities Depicted on Map

A-	NEW	Paxton, Nebraska
A-	NEW	Sutherland, Nebraska
B-	KJLT-FM	North Platte, Nebraska
C-	KELN(FM)	North Platte, Nebraska
D-	KXNP(FM)	North Platte, Nebraska
E-	KMCX-FM	Ogallala, Nebraska

Bold-faced facilities are those in which the applicant has an attributable interest.
