

**Compliance with Special Operating Conditions**

The Construction Permit contains several Special Operating Conditions, summarized as follows:

1. Waiver of 47 C.F.R. Section 73.1125 was previously granted to allow operation of the facility authorized by this construction permit as a satellite operation of station KLRD-FM. Note that the Commission has agreed to change the primary station to KLVR-FM with the instant application.
2. The permittee/licensee, in coordination with other users of the site, must reduce power or cease operation as necessary to protect persons having access to the site, tower, or antenna from radiofrequency electromagnetic fields in excess of FCC guidelines.

Educational Media Foundation ("EMF"), complies with, or agrees to, these conditions, as follows:

1. EMF reiterates the commitments outlined in its request for waiver of section 73.1125. See also Exhibit 6.
2. EMF agrees to reduce power or cease operation as necessary to protect persons having access to the site, tower, or antenna from radiofrequency electromagnetic fields in excess of FCC guidelines.
3. Since this facility is directional, EMF is also providing:
  - a. The results of a complete proof-of-performance to establish the horizontal plane radiation patterns for both the horizontally and vertically polarized radiation components. See Exhibit 9A.
  - b. An affidavit from a licensed surveyor to establish that the directional antenna has been oriented at the proper azimuth. See Exhibit 9B.
  - c. An affidavit that a qualified engineer oversaw the installation of the directional antenna system. See Exhibit 9C.
  - d. A statement that the relative field strength of neither the measured horizontally nor vertically polarized radiation component exceeds, at any azimuth, the value indicated on the composite radiation pattern authorized by the construction permit. See Exhibit 9A.

Therefore, all Special Operating Conditions of the WLKB (formerly WTRK) Construction Permit (FCC File Number BMPED-20060714ACD) have been met.
