ELECTROMAGNETIC FIELD STRENGTH MEASUREMENTS STATEMENT

Cohen, Dippell and Everist and Hatfield & Dawson have been retained by both the owners and the users of the Deer Point transmitting facility to assure that radiofrequency electromagnetic fields of this facility comply with FCC Guidelines. This site is in the process of being upgraded. There are several towers being constructed or dismantled, and most of the TV and FM facilities on Deer Point are undertaking some change in their main and/or auxiliary facilities. Radiofrequency electromagnetic fields measurements will be made when work is substantially completed. We expect that construction will be finished within three to nine months.

These measurements will determine if this site requires additional fencing. This site is posted with appropriate warning signs. All of the users of this site have an agreement and are required to follow appropriate safety procedures before any work is commenced on the antenna towers, including reduction in power or discontinuance of operation before any maintenance work is undertaken (CP Condition #2 and #5).

30 August 2001

Stephen S. Lockwood, P.E.
