*"Surveys you can count on."*

## SURVEYOR'S DECLARATION

I, Elza Dwayne Wheatley, PLS, subject to the penalty of perjury, do declare the following:

1. I am a licensed surveyor in the state of Kentucky.
2. I have provided professional services for Wallingford Broadcasting, Richmond, KY during the installation of the directional antenna.
3. I declare that the following methods were used to orient the directional antenna to 181.5 degrees Azimuth from True North as authorized in the Construction Permit.
  - a. Site control was established by GNSS RTK survey method. The GNSS project was oriented to True North using the CORRS system, Geoid 12B CONUS.
  - b. The GNSS was then occupied with a TopCon total station.
  - c. Total station Direct Reflectorless measurements were taken on both ends of the antenna.
  - d. The bearing perpendicular to the resultant points was determined to produce the ultimate azimuth of the antenna.
4. I further declare that the accuracy of the survey is within a tolerance of +/- one degree.

Sincerely,

A handwritten signature in blue ink, appearing to read "Elza Dwayne Wheatley", is written over a large, loopy scribble.

E. Dwayne Wheatley
