

Michael Stark, Director of Engineering  
New Mexico Operations  
2700 San Pedro Blvd. NE  
Albuquerque, NM 87110-3333  
(505) 830-6473, Fax (505) 830-6599

**Federal Communications Commission**

**Re: Permit File Number BXPB-20020503AAA, Facility ID 65704  
(Construction Permit for KTEG Auxiliary Antenna)**

**Pursuant to Special operating conditions specified in this permit:**

- The Scala model CL-FM antenna for this facility is hereby certified to have been installed per the manufacturers specifications, and in such a manner as to preclude any pattern distortion by near field objects from that specified in the Kathrein-Scala Corp. field pattern specifications. The manufacturers measured pattern data is attached. Also see Feb.7, 2003 correspondence from Mike Johnson of Kathrein-Scala regarding this issue.
- The antenna is installed on an Azimuthal alignment of 217 degrees True in compliance with permit specifications. The antenna bearing was then verified by a licensed surveyor to assure proper alignment. (Surveyors affidavit included in this package)
- I personally supervised the installation of this antenna.
- My qualifications to certify this installation include:
  - I am licensed by the FCC (# PG-15-12764 (formerly # P1-15-20220))
  - I am a certified engineer per the National Association of Radio and Telecommunications Engineers (NARTE cert. # E1-000981).
  - I have over thirty years of RF engineering and telecommunications experience.
  - I am currently employed by Clear Channel Radio as Director of Engineering / New Mexico Operations.

**Certified by my hand the tenth day of February, 2003**

A handwritten signature in cursive script that reads 'Michael A. Stark'.

**Michael A. Stark**
