

Displacement

In the letter dated January 3, 2008 from Qualcomm to KRMZ-LD, Qualcomm notified KMRZ-LD of a predicted interference from KMRZ-LD to its channel 55 transmitters (WPWU989) and requested KMRZ-LD to cease its plans to operate on channel 55. See Attachment A. KRMZ-LD is therefore displaced off of channel 55 in Banning, CA and by this application, proposes to operate on channel 12 in Rialto, CA. The proposed KMRZ-LD facility on channel 12 overlaps contours with the authorized but displaced digital facility on channel 55 of KMRZ-LD as well as the authorized analog facility on channel 69 of KMRZ-LP.
