

Exhibit 1
Changes to Pending Application and

3/12/2007

Expedited Processing Request

Refuge Media Group is submitting this instant application to change location of the transmitting antenna and equipment. The original antenna site, a grain elevator, was lost due it being sold and shut down. We have been working on setting up a lease on an AM station tower; however, we do not feel we will be able to get everything done on time in order to file a timely license to cover to avoid the expiration of our Construction Permit (CP.) Therefore we are submitting this application so we can get this ready to be on the air in time to file our License to cover in a timely fashion.

The CP for this translator expires March 29, 2007 and as such **Refuge Media Group is also respectfully asking for expedited processing of this application.** This application must be approved in enough time so we can apply for license before the expiration date of the Construction Permit.

The following changes are being made (all in section III-A Engineering:)

Question 4: Antenna Location Coordinates are changed to 43° 31' 14" NL, 96° 47' 27" WL

Question 6: Antenna Location Site Elevation Above Mean Sea Level is changed to 446 meters

Question 7: Overall Tower Height Above Ground Level is changed to 10 meters

Question 8: Height of Radiation Center Above Ground Level is changed to 10 meters (H), 0 meters (V)

Question 9: Effective Radiated Power is changed to 0.005 kW (H-pol only)

Question 10: Transmitting Antenna is changed to a Scala model FMO-single element

Exhibit 11 explains the Primary station being rebroadcast

Exhibit 12 is changed to reflect the new engineering data
