

TECHNICAL EXHIBIT  
APPLICATION FOR CONSTRUCTION PERMIT  
TV TRANSLATOR K20BR  
GAGE, OKLAHOMA  
CH 20 0.54 KW

Technical Exhibit

The technical exhibit supports a digital flash-cut application for K20BR assigned to Gage, Oklahoma. The purpose of this application is to flash-cut to digital operation. No change in transmitter site is proposed.

Summary of Proposed Facilities

Below is a tabulation of the proposed paired digital facility:

Channel:	20
Geographic Coordinates:	36° 26' 05" North Latitude
	99° 46' 28" West Longitude
Antenna Structure Registration:	1036309
Overall Tower Height:	80.2 meters
Ground Elevation:	734.6 meters
Radiation Center:	808 meters AMSL
	73 meters (240 feet) AGL
Antenna Type:	Scala 770-881 (8 dBd gain)
	Omni-Directional
Antenna Major Lobe Orientation:	N/A
Transmitter Power Output:	125 watts
Emissions Mask:	Stringent
Maximum Effective Radiated Power:	0.540 kilowatts (540 watts)

Figure 1 is a map depicting the proposed and existing translator contours.

---

Post-Transition Allocation Considerations

A study has been conducted to assure that the proposal will not create prohibited interference with other post-transition licensed, authorized or pending analog or digital TV, LPTV/translator and Class A TV stations. Using the procedures outlined in the FCC's OET-69 Bulletin, the allocation study is provided in Figure 2.

Radiofrequency Electromagnetic Field Exposure

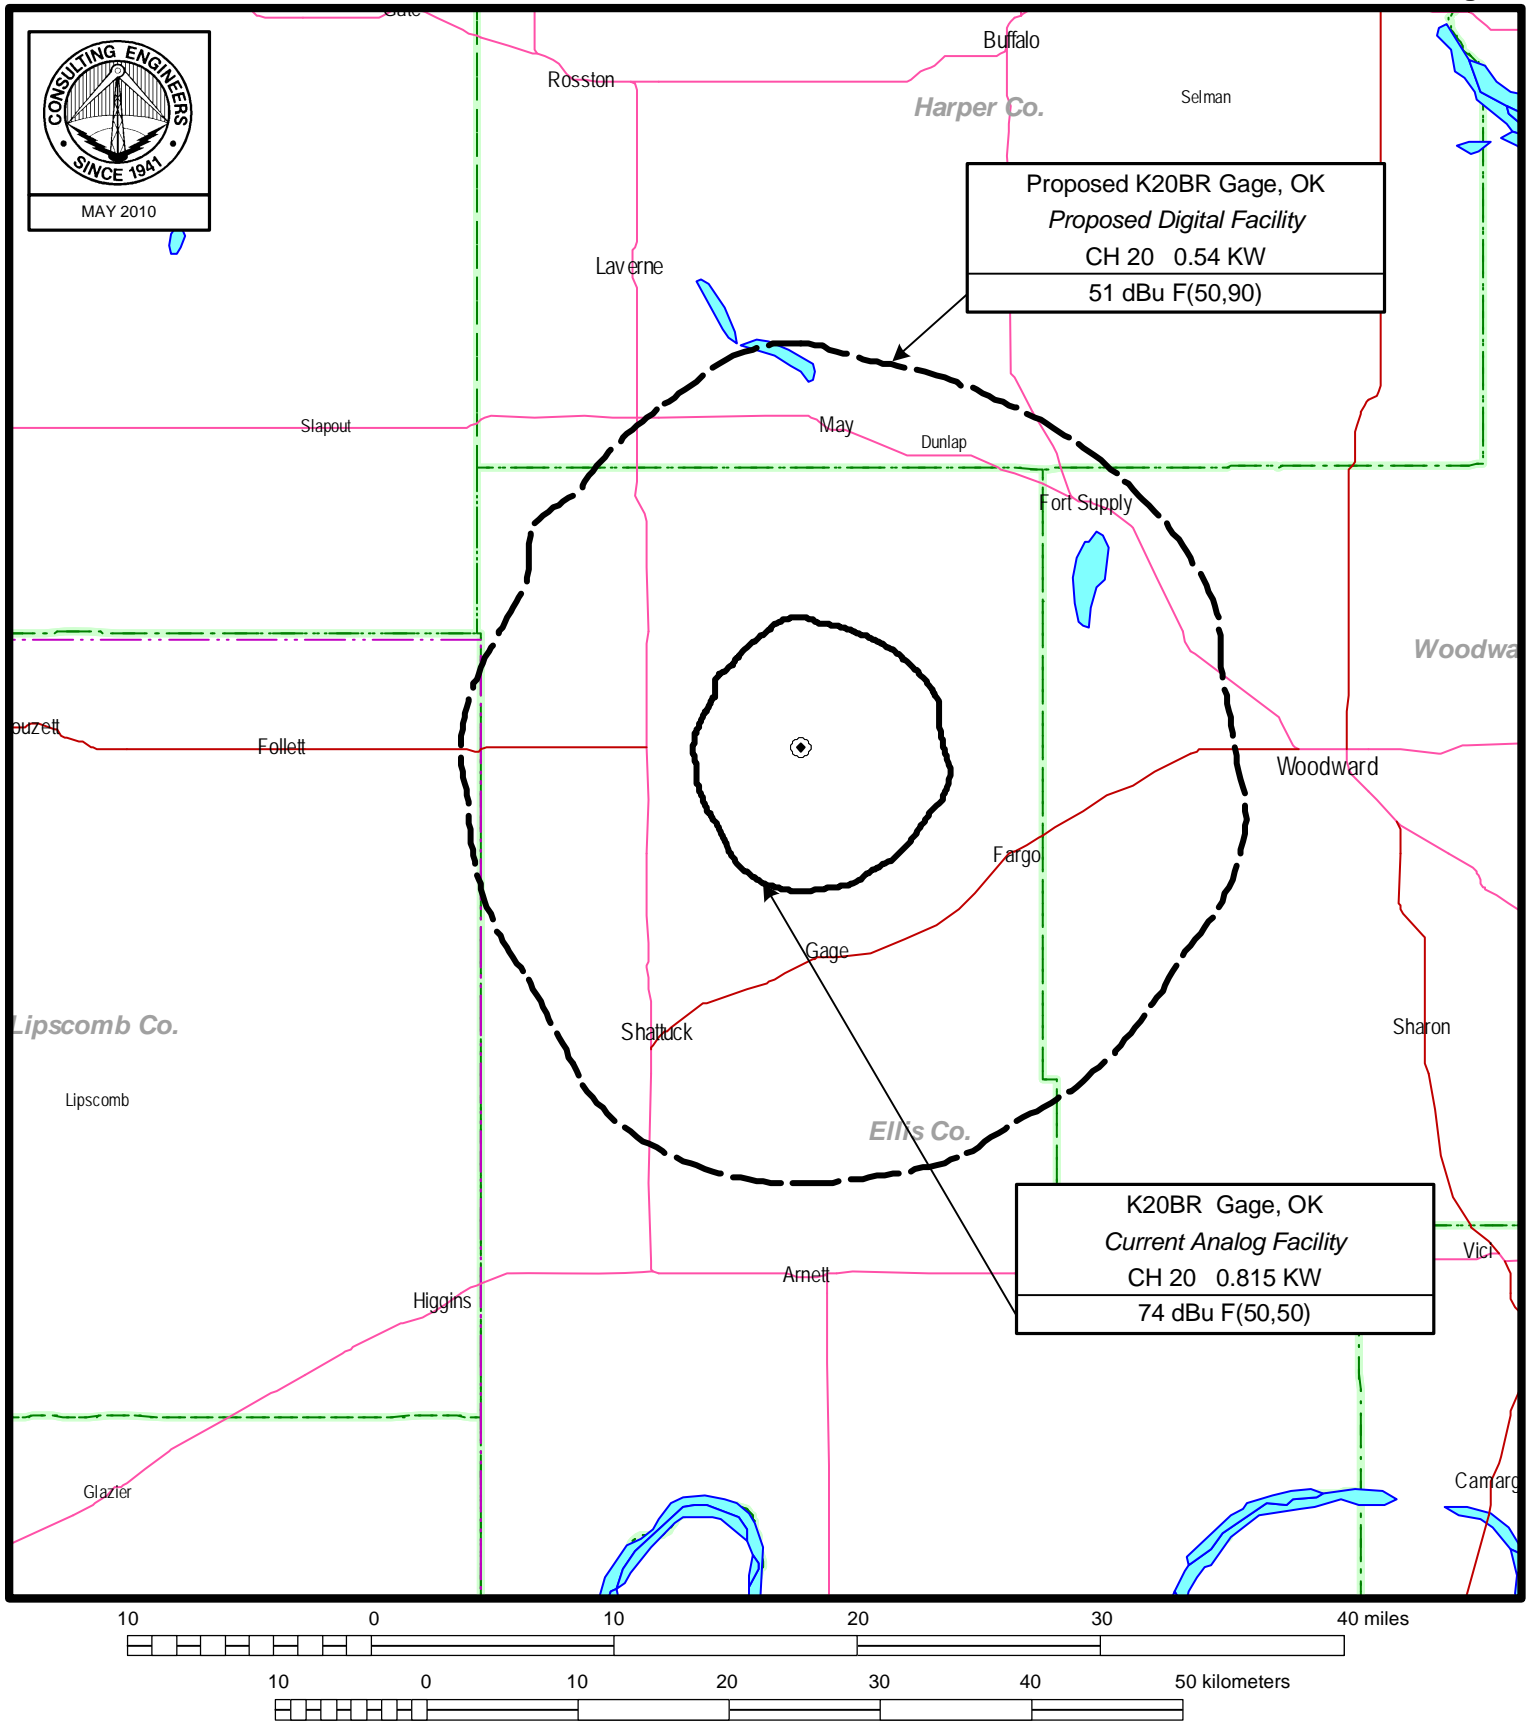

The proposed facilities were evaluated in terms of potential radio frequency (RF) energy exposure at ground level to workers and the general public. The radiation center for the antenna is located 73 meters above ground level. The proposed ERP of 0.54 kW is assumed. A conservative relative field value of 0.5 was assumed for the Scala antenna's downward radiation. The calculated power density at ground level is  $0.001 \text{ mW/cm}^2$ . This is less than 5% of the FCC's recommended limit of  $0.34 \text{ mW/cm}^2$  for channel 20 for an "uncontrolled" environment.

Access to the transmitting site will be restricted and appropriately marked with warning signs. In the event that workers or other authorized personnel enter restricted areas or climb the tower, appropriate measures will be taken to assure worker safety with respect to radio frequency radiation exposure.

It is noted that this statement only addresses the potential for radiofrequency electromagnetic field exposure. All other aspects of the environmental processing analysis will be or already have been provided to the FCC by the tower owner as part of the tower registration process.
