**RADIO TRAINING NETWORK, INC.**  
**KWND RADIO STATION**  
**CH 202C1 - 88.3 MHZ - 40.0 KW (DA)**  
**SPRINGFIELD, MISSOURI**  
**March 2007**

**TECHNICAL STATEMENT**

This Technical Statement and attached exhibits were prepared on behalf of Radio Training Network, Inc. ("RTN"), licensee of station KWND, Channel 202C3, Springfield, Missouri. RTN herein submits a minor change application seeking to raise the height of the KWND antenna system, increase power, and change to a Class C1 facility. The proposed changes will be implemented at the present transmitter site.

RTN is proposing to locate the KWND antenna on its existing tower. As such, the Federal Aviation Administration ("FAA") was not apprised of this proposal. The tower on which the KWND antenna will be located has been registered with the Commission and assigned Antenna Structure Registration Number 1003647. All exhibits called for on FCC Form 340, Section VII, are attached hereto, including an analysis of the proposed facilities in comparison to all other potentially impacted non-commercial stations on co- and adjacent channels (see Exhibit A). The proposed KWND facility is within the reference distance to VHF television stations KMOS-TV, Sedalia, Missouri and KEMV, Mountain View, Arkansas. See Exhibit B for §73.525 compliance.

As there is a high power FM station located at the proposed KWND site, the worksheets associated with FCC Form 340 could not be used to certify compliance with the Commission's

radio frequency exposure limits. Therefore, attached as Exhibit C is a study showing this proposal complies with the RF exposure limits. All other exhibits used to certify the information contained in the application have been forwarded to RTN and are available for submission to the Commission upon request.
